William J. Walsh, PhD

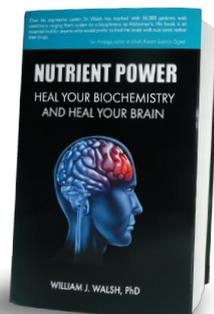

William J. Walsh, PhD, is president of the non-profit Walsh Research Institute near Chicago and directs physician and practitioner training programs internationally including in Australia, England, Ireland, Norway and USA. By 2016, he has trained more than 200 Australian doctors.

An internationally recognised expert on biochemical imbalances, Dr. Walsh has devoted nearly 40 years to researching the biochemistry behind behaviour, learning and memory, mental health and various disease conditions. He developed science-based, advanced nutrient therapies that have helped thousands of patients challenged by behavioural disorders, Depression, Anxiety, Schizophrenia, ADHD, Autism, and Alzheimer's disease, and are used by doctors throughout the world.

Dr. Walsh's approach recognises that nutrient imbalances can alter brain levels of key neurotransmitters, disrupt gene expression of proteins and enzymes, and cripple the body's protection against environmental toxins. His book, *Nutrient Power* (Skyhorse Publishing, 2012), describes his findings and the advanced nutrient therapies which correct biochemical imbalances that are causing learning, behavioural, developmental and mental health issues. Dr. Walsh has authored more than 200 scientific articles and reports and has five patents. He has presented his experimental research at the American Psychiatric Association, the U.S. Senate, the National Institute of Mental Health, and has been a speaker at 30 international conferences. His early work included a twelve-year collaboration with the renowned (late) Carl C. Pfeiffer, MD, PhD of Princeton, NJ (USA).

"Over his impressive career, Dr. Walsh has worked with 30,000 patients with conditions ranging from Autism to Schizophrenia to Alzheimer's. His book is an essential tool for anyone who would prefer to heal the brain with nutrients rather than drugs" (Teri Arranga, Director of Autism One, www.autismone.org).

Order your copy of *Nutrient Power* online at www.walshinstitute.org

Pfeiffer's Law

"For every drug that benefits a patient, there are natural substances that can produce the same effect."

Carl C. Pfeiffer MD, PhD.

Medical Doctor Training Program

Early Bird Concession \$1870 Inc GST if paid before 9 December 2016.

Full Rate \$2090 Inc GST if paid after 9 December 2016.

Bookings & Payments (Mon-Wed-Fri only)

Mastering Brain Chemistry™-

A Training Program for Medical Doctors,

covers Advanced Nutrient Therapy Protocols for Mental and Behavioural Disorders

pioneered by the late Dr. Carl Pfeiffer and

further developed through extensive research and clinical experience by Dr. William J. Walsh.

Advanced evaluation and treatment techniques for Autism Spectrum Disorders will be also be covered in detail.

Participating USA Experts:

William J. Walsh, PhD

Elizabeth Mumper, MD, FAAP

Nancy O'Hara, MD

Albert Mensah, MD

Judith Bowman, MD

Better Health Through Bio-Chemistry

MEDICAL DOCTOR TRAINING PROGRAM

The program delivers training in advanced nutrient therapy methods for mental and behavioural disorders and in cutting-edge Autism therapies. Dr. Walsh and his associates have been visiting Australia since 2004. The program has expanded each year, with 70 doctors participating and 145 patients assessed in 2016.

Prior to the training, each doctor is provided with written and visual learning materials to study. Each has the opportunity to participate with world-class experts in evaluation of more than 45 patients over six days. Participants are asked to assist in the recruitment of patients for assessment, and will be responsible for their continuing care. The USA experts act as consultants to the participating doctors. A pharmacy professional is present to assist in prompt initiation of treatment when assessment is completed. Ongoing advisory backup is available to participants after the Outreach.

Drs. Walsh, Bowman & Mensah will provide training in advanced nutrient therapies pioneered by the late Dr. Carl Pfeiffer. The sessions will include evaluations of patients diagnosed with Behavioural Disorders, ADHD, Clinical Depression, Post-Partum Depression, Bipolar, Schizophrenia, Alzheimer's disease and Autism.

Participants will learn:

- The impact of amino acids, vitamins, and minerals on synthesis and functioning of neurotransmitters
- Nutrient imbalances associated with mental health
- Biochemical classification of Schizophrenia, Bipolar Disorder, Depression and behaviour phenotypes
- Specialised laboratory testing to enable accurate diagnosis
- Effective nutrient protocols aimed at normalising blood/brain chemistry
- The role of epigenetics in mental health
- How to treat zinc deficiency, copper overload, methylation disorders, oxidated overload and other chemical imbalances.

Drs O'Hara, Mumper and Bowman will provide training in advanced Autism protocols that have resulted in numerous reports of great improvement or recovery, including: effective diets; yeast therapies; methyl B-12 treatment; hyperbaric approaches; advanced nutrient therapies; essential fatty acids; chelation; antioxidant protocols, e.g. glutathione promotion; and many other techniques. This training program will enable you to confidently provide lab testing and accurate diagnosis for these disorders and equip you to design effective individualised treatment programs.

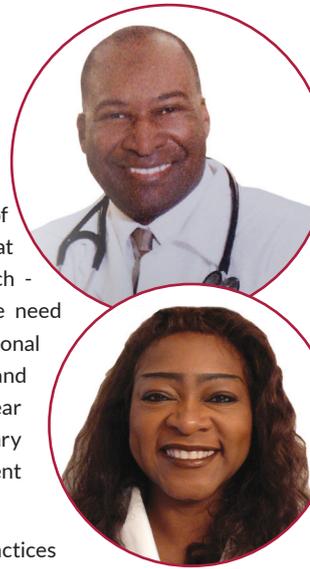

Albert Mensah, MD

Judith Bowman, MD

Dr. Albert Mensah, and Dr. Judith Bowman of Mensah Medical, join Dr. Walsh as trainers at the 2017 Walsh Research Institute Outreach - Mastering Brain Chemistry™. Answering the need for specialists with backgrounds in both traditional as well as natural medicine, Drs. Mensah and Bowman co-founded Mensah Medical near Chicago in 2008 after serving as primary physicians at the original Pfeiffer Treatment Centre (now closed).

As one of the world's leading biomedical practices specialising in biochemical individuality and imbalances, Mensah Medical has helped patients from all over the world and is recognised internationally for their metabolic treatment approaches for patients with Autism, Anxiety, Depression, Post-Partum Depression, behavioural and learning disorders, OCD, eating disorders, Bipolar disorder, Schizophrenia, Alzheimer's disease and Parkinson's disease. Drs. Mensah and Bowman regularly consult with doctors and psychiatrists regarding the application of advanced nutrient protocols.

Autism Spectrum Disorders represent forty percent of Dr. Bowman's patient population. She utilises the foundational Walsh/Pfeiffer methodologies in a comprehensive fashion to heal the mind, body, and soul of not only Autistic patients, but their families as well. www.mensahmedical.com

"I think this experience will prove to be the single most practice-changing and influential event I have ever done."

"This is a wonderfully interactive, practical, evidence-based learning experience." Class of 2016

Elizabeth Mumper, MD, FAAP

Dr. Elizabeth Mumper is President and CEO of Advocates for Children and Advocates for Families and Founder of The Rimland Center.

Dr. Mumper graduated magna cum laude from Bridgewater College and attended the Medical College of Virginia, did residency training at the University of Massachusetts and University of Virginia where she served as Chief Resident of Paediatrics at UVA.

Dr. Mumper has published several research papers related to Autism in the peer reviewed medical literature, she has chapters on allergy, immunology and behavioural and developmental paediatrics published in "Paediatrics" a board review series book for medical students.

www.rimland.com

Nancy O'Hara, MD

Dr. Nancy O'Hara is a board certified Pediatrician. Prior to her medical career, Dr. O'Hara taught children with autism. She graduated with highest honors from Bryn Mawr College and as a member of the Alpha Omega Alpha Honor Society from the University of Pennsylvania School Of Medicine. She earned a Master's degree in Public Health from the University of Pittsburgh. After residency, chief residency and general pediatric fellowship at the University of Pittsburgh, Dr. O' Hara entered general private practice in 1993, and in 1998 began her consultative, integrative practice solely for children with special needs. Since 1999 she has dedicated her practice to the integrative and holistic care of children with neurodevelopment disorders, ADHD, PANDAS/PANS, OCD, Lyme and Autistic Spectrum Disorder. She is a leader in the training of clinicians, both in the US and abroad. www.ihealthnow.org

Mastering Brain Chemistry™ - A Training Program for Medical Doctors, is organised and managed by Bio-Balance Health Association Inc., a not-for-profit organisation dedicated to promoting effective techniques of biochemical treatment for mental, behavioural and Autistic disorders. www.biobalance.org.au
