

MASTERING BRAIN CHEMISTRY

ONLINE TRAINING COURSE

Directed by William Walsh, PhD, this international training course is science-based with advanced nutrient therapies for patients challenged by behavioral disorders, depression, anxiety, schizophrenia, ADHD, autism, and Alzheimer's disease. Over 1,200 physicians and medical practitioners from 80 countries have completed this training.

The program is designed to prepare licensed medical professionals to confidently incorporate these protocols into clinical practice immediately following program completion.

Live webinars are recorded and available for replay for participants who are unable to attend live or wish to revisit the material.
